

What Are the Top Five Electric Cars I Should Consider for My Business Fleet?

Switching your fleet to electric can lower your running costs, reduce emissions, and improve your company's environmental profile.

But which EVs give you the best value?

Here are five electric cars UK businesses are using right now, based on range, cost, reliability, and leasing flexibility.

1. Tesla Model 3 Rear-Wheel Drive

- **WLTP range:** up to 318 miles
- **List price:** from £39,990
- **Typical lease:** from £470/month (48 months, 10k miles/year)

Why it works:

Great for sales reps, consultants, and regional managers.

Long range and fast charging reduce downtime between meetings or site visits.

Ask yourself:

Do your teams spend most of their week on the road?

The Model 3 supports high mileage without the fuel bill.

2. MG4 EV Long Range

- **WLTP range:** up to 323 miles
- **List price:** from £29,495
- **Typical lease:** from £320/month

Why fleets choose it:

Strong range for its price point.

Low BiK makes it popular with both employers and drivers.

Real-world fit:

Works well for local teams or mixed driving patterns.

If you want affordable scale-up across multiple locations, start here.

3. Hyundai IONIQ 6

- **WLTP range:** up to 338 miles
- **List price:** from £47,040
- **Typical lease:** from £500/month

What makes it practical:

Aerodynamic design boosts range, even on motorway-heavy routes.

Spacious interior helps with long days behind the wheel.

Think about this:

Do your drivers take longer, intercity journeys?

The IONIQ 6 supports high mileage with less charging disruption

4. Kia Niro EV

- **WLTP range:** up to 285 miles
- **List price:** from £37,325
- **Typical lease:** from £420/month

Why it suits fleets:

Compact SUV size with good boot space and headroom.

Low running costs make it ideal for company cars or shared pool vehicles.

You might ask:

Is comfort and flexibility more important than speed or luxury?

The Niro EV gives your team all-day comfort with enough battery to spare.

5. BMW i4 eDrive40

- **WLTP range:** up to 365 miles
- **List price:** from £50,365
- **Typical lease:** from £580/month

Why businesses pick it:

Exec-level comfort and performance with strong real-world range.

Used in management fleets and high-mileage roles.

Is this you?

Need a car that supports image, driver experience, and long-distance travel?

The i4 is often used to replace diesel saloons in company fleets.

Questions to Ask Before Choosing

- What's the average daily mileage for your fleet?
- Will your team charge at home, at work, or on the road?
- Do you need a single model or a mix across departments?
- Can your budget support upfront or leased deployment?

The right EV depends on how you operate and scale.

Focus on range, charging speed, cost per mile, and Benefit in Kind value.
Match the model to your use case.

That's how you build a business fleet that performs without the fuel bills.
