About ECC UK

ECC UK believe helping automotive related businesses find a solution that is tailored to their clients immediate and future needs.

Experienced and trained

We have many years of experience in electric vehicle charging and infrastructures, allowing us to give factual and impartial advice on what is best for your business.

Our teams are specifically trained and qualified to install electric vehicle charging points.

National coverage

Our business is national, making it easy for our customer to deploy one EV expert to implement their charging infrastructure.

OLEV approved

We are approved and regulated by The Office of Low Emission Vehicles which enables us to discount up to £7,000 grant funding for businesses and £350 discounted for each home charger

Deal with one partner

Choice of equipment

ECC UK select only quality OLEV approved charge point manufacturers that allow us to confidently specify the right charging point for the right application.

Choice of management system

ECC UK work with a range of different Charge Point Operators (CPO's) and back office systems to help you or your client manage payments, accounting and reporting.

Choice of ownership

ECC UK offer a range of ownership, funding and payment schemes, allowing you to get the right type of solution you need today, all within you or your clients desired budget.

Free staff training

Offering your clients with the correct advice about charging their vehicle in public, at home or at work, it is important they are trained with basic and factual information. ECC UK provide automotive businesses with FREE staff training when becoming a partner

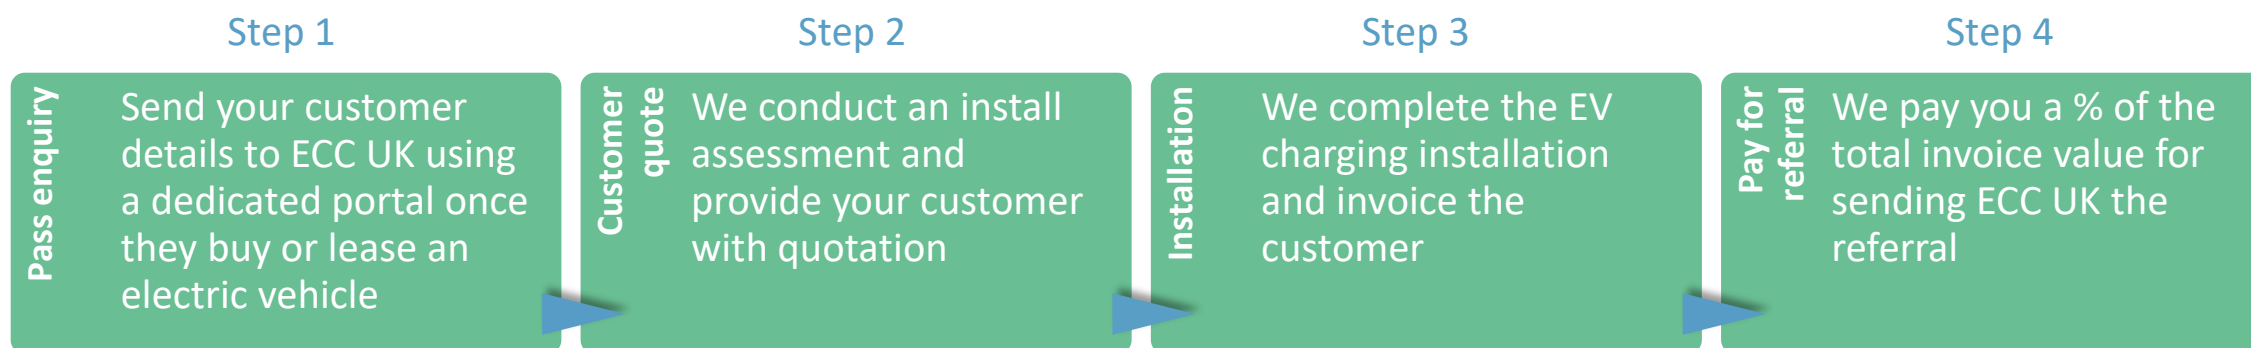

Generate new revenue

ECC UK helping automotive businesses generate a new revenue stream whilst allowing them to add value to their customers by offering a charging point provider for their home or business.

Many businesses are switching to electric for the very first time, so offering expert advice and support to your clients will help them recommend your business in the future.

ECC UK pay for referrals

Implement a simple referral process within your business to allow you to pass your customer details to us, and we do the rest;

Charging equipment

ECC UK will help guide you and your clients towards choosing the right equipment for you.

We work with 10 leading and award winning manufacturers of EV charging equipment to ensure we have the product for all charging needs.

Our charging points range from modern and stylish units through to vandal proof and industrial units.

We have something for all environments and tastes:

Our options include:

Wall mounted

Floor standing pedestals

Charging bollards

Lamp post mounted

Complete charging lamp posts

Rapid charging stations including CCS and CHAdeMO

Choice of equipment

ECC UK work with OLEV approved manufacturers who offer a 3 warranty on all equipment. All ECC UK installers have received manufacturer product training

Driver friendly

Charging electric vehicles should be easy and accessible.

All of our equipment ranges are OCPP1.6 compatible, which allows us to offer different methods to manage and activate you or your clients charging sockets.

We provide impartial advice on how to best implement an activation solution that can allow customers, staff and/or fleets to charge their vehicles completely hassle free.

Our options include:

Free to use

Keyswitch

RFID cards or fobs

Token systems

Payment functions

ECC UK will guide your business to ensure you find the right method of activation

Ownership options

ECC UK offer a wide range of payment and ownership options to help you deliver the charging solution you need now.

Purchased solutions - Perfect for businesses who want to buy the EV charging hardware to charge their company fleets and sponsor their employees' electricity.

OLEV contribute up to £7,000 towards a purchased solution for fleet or staff use.

Pay monthly – Leasing your solution with a fixed monthly investment is great for businesses who either require a large investment to implement their ideal charging infrastructure, or have the opportunity to generate revenue from customer, public or residential charging.

All leasing agreements are subject to credit

Fully funded – No upfront or ongoing payments, ideal for business to consumer companies who are looking for an easy to implement solution that can generate risk free revenue immediately and in the future.

Vehicles

What is OLEV and how does it work?

The OLEV Workplace Charging Scheme (WCS) is a voucher-based scheme that provides support towards the up-front costs of the purchase and installation of electric vehicle charge points

-Qualifying businesses can claim up to £7,000 off the cost of your EV charging points under the Workplace Charging Scheme (WCS)

-Companies can purchase up to 20 EV charging points at a subsidised cost, with each charging 'socket' having as much as £350 price reduction

The installation

ECC UK provide the complete installation service, from to start to finish, irrespective of where your sites are located in the UK.

All of our installation work is covered by 12 months warranty and we cover:

- Equipment supply
- Electrical installation
- Liaising with DNO
- Groundworks and civils
- Protection barriers
- Signage
- Testing and commissioning
- Back office set up
